

# Introducing the Trans-European Transport Network Executive Agency

Jaroslav Kotowski  
Project Manager  
TEN-T EA

Madrid, 26 June 2008

# TEN-T Executive Agency

- **Mission**
- **Tasks of the European Commission and the Agency**
- **Daily actions**
- **Added value**

# Mission

Provide an efficient and effective service in managing the technical and financial implementation of the European Commission's TEN-T programme.

# Tasks

## European Commission defines the policy

- Makes political decisions regarding the programme
- Defines strategy, objectives and priority areas of action

## TEN-T EA turns the policy into action

- Implements the TEN-T programme on behalf of the EC and under its responsibility
- Efficiently manages entire project lifecycle, including:
  - » Organising calls and evaluations
  - » Giving support to Member States

# Tasks

## European Commission defines the policy

- Takes the final financing decisions
- Monitors and supervises the Agency

## TEN-T EA turns the policy into action

- Prepares financing decisions
- Provides key feedback to the EC

# Daily actions of the TEN-T EA

- Ensuring the technical and financial management of TEN-T projects
- Collecting, analysing and transmitting to the Commission all information required for implementation
- Assisting the Commission with programming
- Checking conformity of projects co-financed by the EU with transport policy rules and principles
- Providing technical support to project promoters and to financial institutions managing the loan guarantee
- Providing technical and administrative support requested by the Commission

# Added value of Agency

## Benefits to all stakeholders!

- More dedicated resources to better monitor and control the implementation of the TEN-T projects
- New project management approaches, techniques & IT tools (GIS, internal IT tools such as ePMS and TEN-Tec)
- Simplified and streamlined procedures and work flows (revised models, forms, and requirements)
- Faster response times (reduced payment delays and rapid reaction on requests made by beneficiaries)
- Increased services (expertise in financial engineering, PPPs, transport engineering) and targeted flow of information to project promoters, Member States and the Commission
- Improved visibility for EU support to infrastructure projects through dissemination activities
